## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 1-11 & 23-36 and claims 12-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 1-11 & 23-36 disclose a guide optical system; there is no basis for this limitation in applicant's specification. Claims 12-22 disclose an optical guide means there is no basis for this limitation in applicant's specification.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 10-16, 18, 20-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonner et al. (USPN 6,251,516).

Bonner et al. disclose isolation of cellular material under microscopic visualization. An imaging system is used to receive sample images. A laser is used to cut the desired section, which is then transfer to a slide for further examination and analysis. The system allows unaltered microscopic observation prior to, during and following processing. Additionally, microscopic objectives are used.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 8-9, 17, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonner et al. as stated above and further in view of Caprioli (USPN 6,756,586).

Bonner et al. does not teach the evaporation of the imaging sample. Caprioli discloses the use of a laser beam to release samples for analysis. It would have been obvious to one of ordinary skill in the art at the time of the invention to use the release technique as taught by Caprioli in the Bonner et al. system because this yields more data for study and evaluation.

***Response to Amendment***

The amendment filed 5/2/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: an "optical guiding means". Applicant is required to cancel the new matter in the reply to this Office Action.

***Response to Arguments***

Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection.
